Personal website developer Ilir Fiora New York, USA

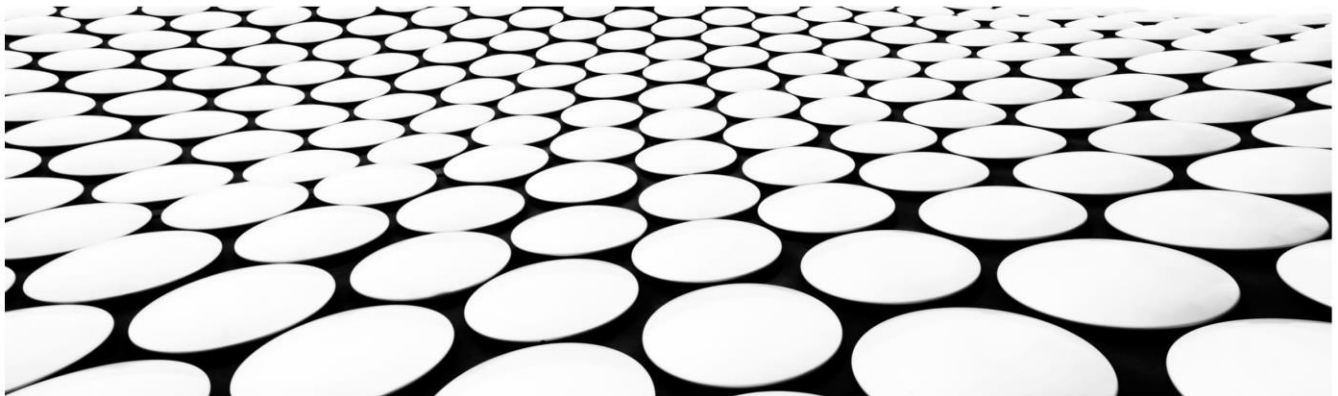

SKILLS

Libraries and Tools: Android SDK, Volley, Room, Glide, Google Maps, Mapbox, Android Studio, Git, Firebase, Google Cloud Platform, AdMob, XML Layouts

PORTFOLIO

WEBSITE AND MOBILE APPLICATION | UI/UX DESIGN | GRAPHIC DESIGN

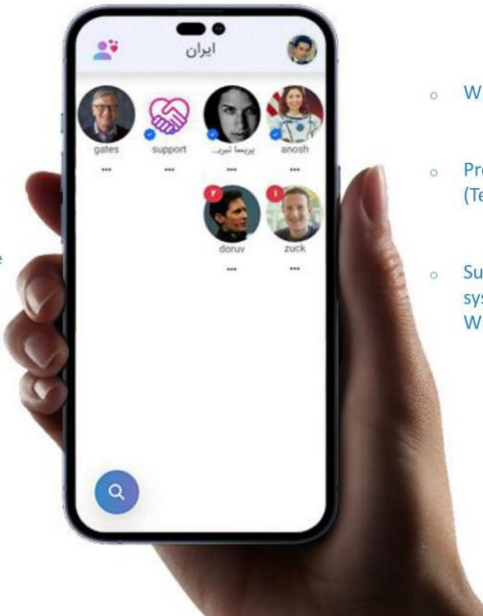

T H E B E S T

DESIGN AND
PROGRAM

Independent WebApp Social Media Developer

- Completely new and different user design
- Register without a phone number
- View all images and videos in groups, chats, and channels without downloading to your phone
- All encrypted messages are stored in the database and only for the user is visible (End-to-End Encrypted).
Example: "Hello" => "daskjdkjoi9034mlkmcvkejo89"

- Without receiving any information and phone access
- Program size: 4 MB.
(Telegram: 600 MB, WhatsApp: 96 MB)
- Supported platforms: website, Android operating system, Apple iOS operating system – Blackberry Windows Phone and..

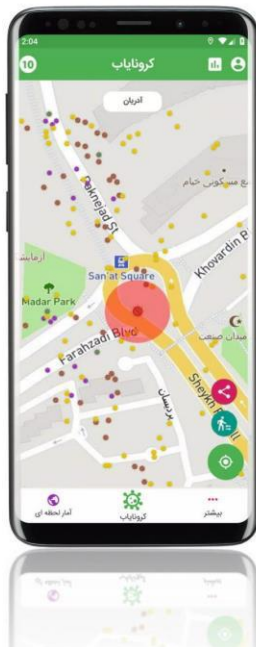

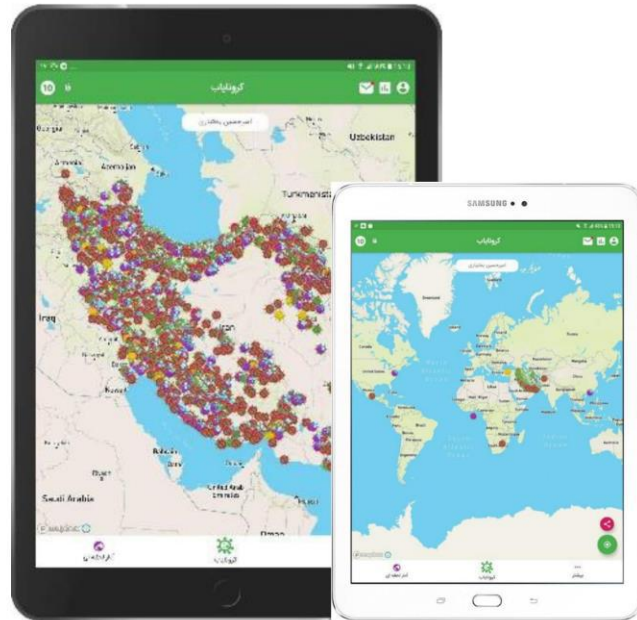

We implemented and built was the creation of a small social network that we used for messaging and chatting between my friends and family. Unfortunately, due to internet limitations in Iran, I had to find a way to send messages and share videos and photos without any restrictions, quickly and very securely among my friends. I completed the design and programming of this site and application by myself for 6 months and at least 20 hours of programming per day and implemented it on my personal server.

Independent CoronaFinder Developer

Conceptualized, programmed, and designed the app to identify healthy, suspected, and infected individuals using Google Maps. Developed a robust database and implemented AI algorithms to provide accurate, real-time COVID-19 status updates, making it the first Android app of its kind.

Languages support: English, Chinese, Turkish, Arabic and Persian

- Completely new and different user design
- Developed backend logic and algorithms for tracking and displaying COVID-19 statuses
- Integrated Google Maps for real-time status updates of individuals nearby
- Designed database structure to efficiently handle user health data securely
- Countries where users of the CoronaFinder app are located: Iran, USA, China, Mexico, South Africa, India, Indonesia, Armenia, Afghanistan and Turkey.

Independent Open Book Platform Developer

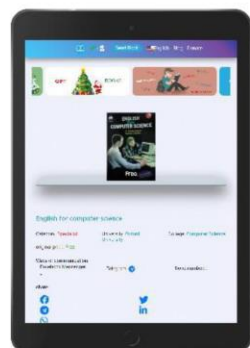

KetabVaz: The Sacred Book, Don't Let It Gather Dust!

KetabVaz is the first and largest website and app for buying and selling new and second-hand student and school books in Iran.

Read It, Sell It:

Turn those books that have been gathering dust on your shelf or under your bed into cash! If you no longer need them, list them on the KetabVaz website or app.

Key Features:

- Direct Contact: Connect directly with sellers without any intermediaries
- Social Sharing: Share listings with photos, price, details, and direct links on social media
- Category Options: Choose your university, book type (general, specialized, foundational, etc.)
- Contact Details: Easily share contact information such as phone number, email, Telegram ID, Facebook, or WhatsApp number for quick coordination

If you've already passed a course with a professor, like Family Planning, Philosophy, Math, Physics, etc., and that textbook is still taking up space, list it on KetabVaz! Just share the book link with friends or groups directly.

Additional Benefits:

- Beautiful, Graphic, and Flexible Design: User-friendly and visually appealing
- Available in 10 Languages: Including Persian, English, German, French, Japanese, Korean, Turkish, Russian, Arabic, and Chinese
- Lightweight App: Just 2 MB, making it fast and easy to download

MAKE ANDROID AND IOS MOBILE APPLICATIONS

FASHION,
MAKEUP,
PHOTOGRAPHY

App Game Sound

A fun single-player and multiplayer game!
The first game between domestic and foreign apps in this genre!

At the beginning of the game, the pictures appear at random and before the time runs out you have the opportunity to imitate sound the character in the picture to the opposite opponent.

App Signature AI

Take a photo of your friends' signatures and recognize them! Did you know that you can recognize their personalities by their signatures?

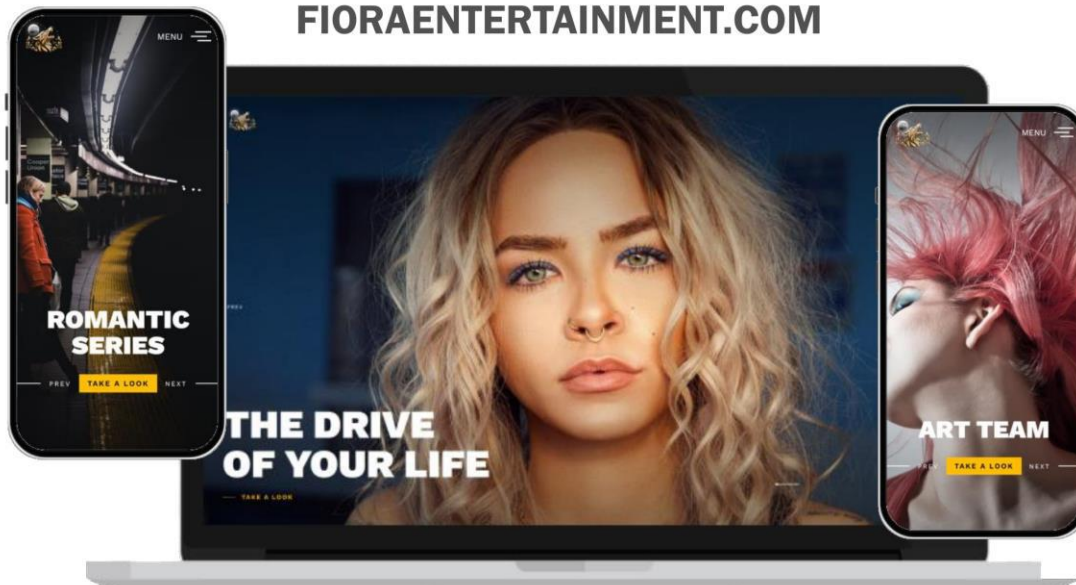

AI-flavored anthropology: Sign, take a photo, send!

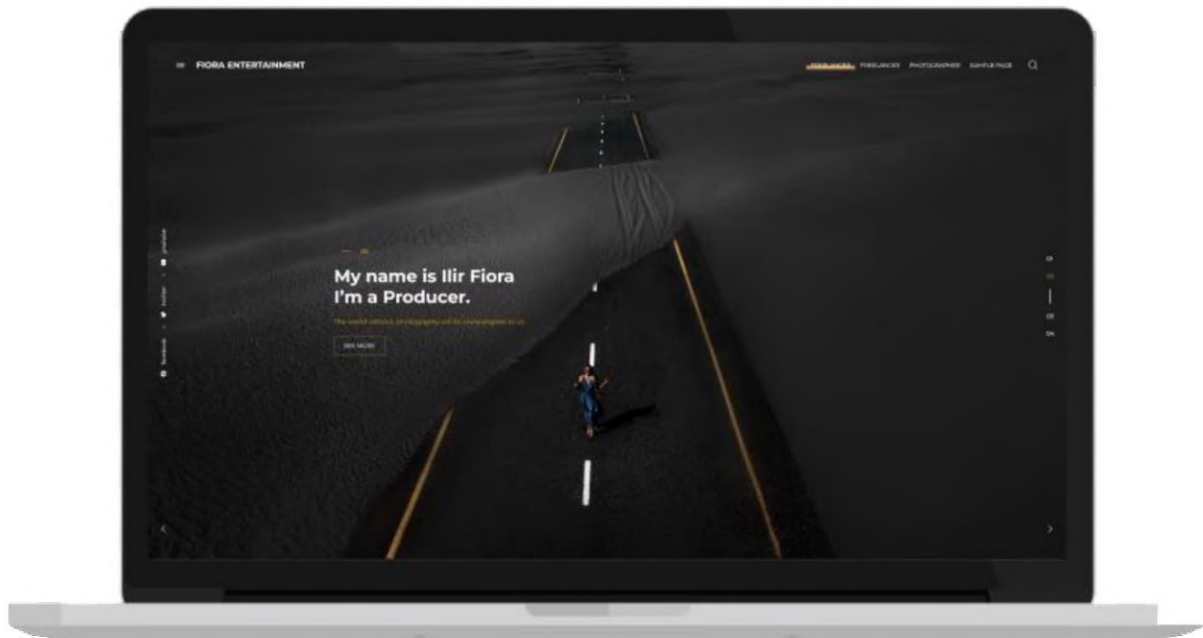

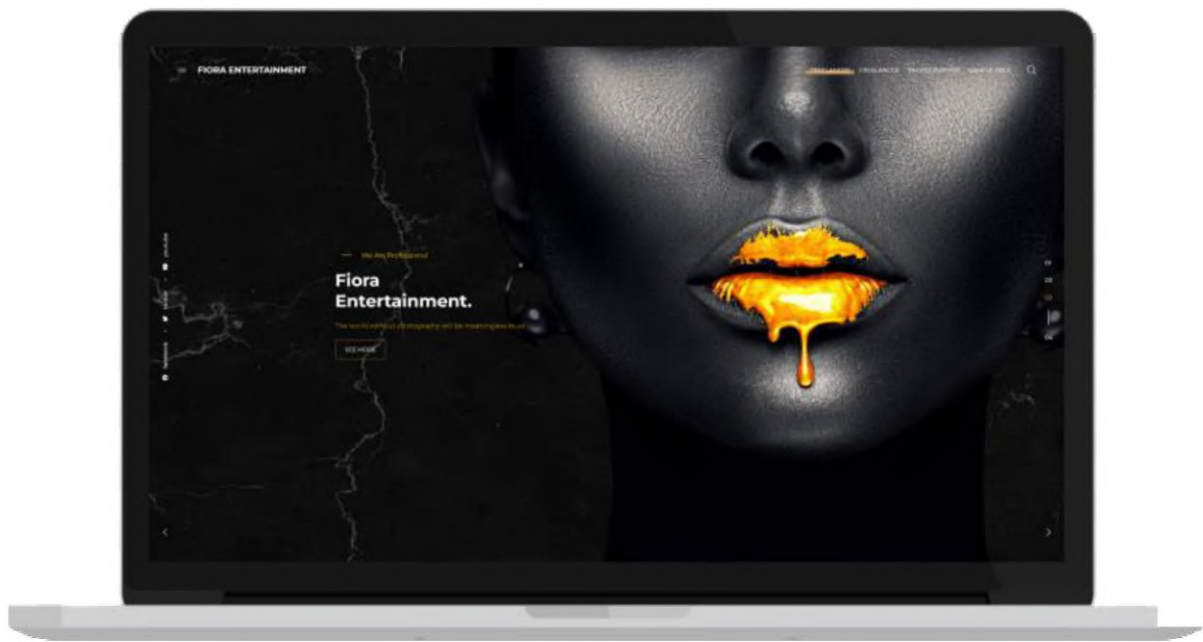

Everyone's signature shows their hidden characteristics. In any form and form (handwriting, signature, drawing shapes and lines, drawing signs, ...) it is an individual work that shows physical, mental-psychological characteristics and identity.
